

PEAK MARQUEE™ TENT MQ1020

10609 Frame Assembly with Aluminum Tubes
10602 Frame Assembly with Steel Tubes

ANCHOR LOAD GUIDE

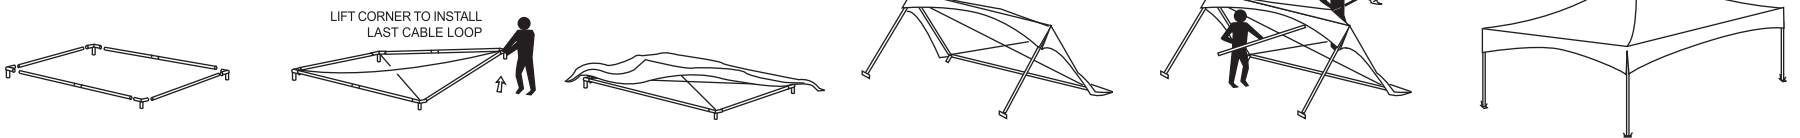

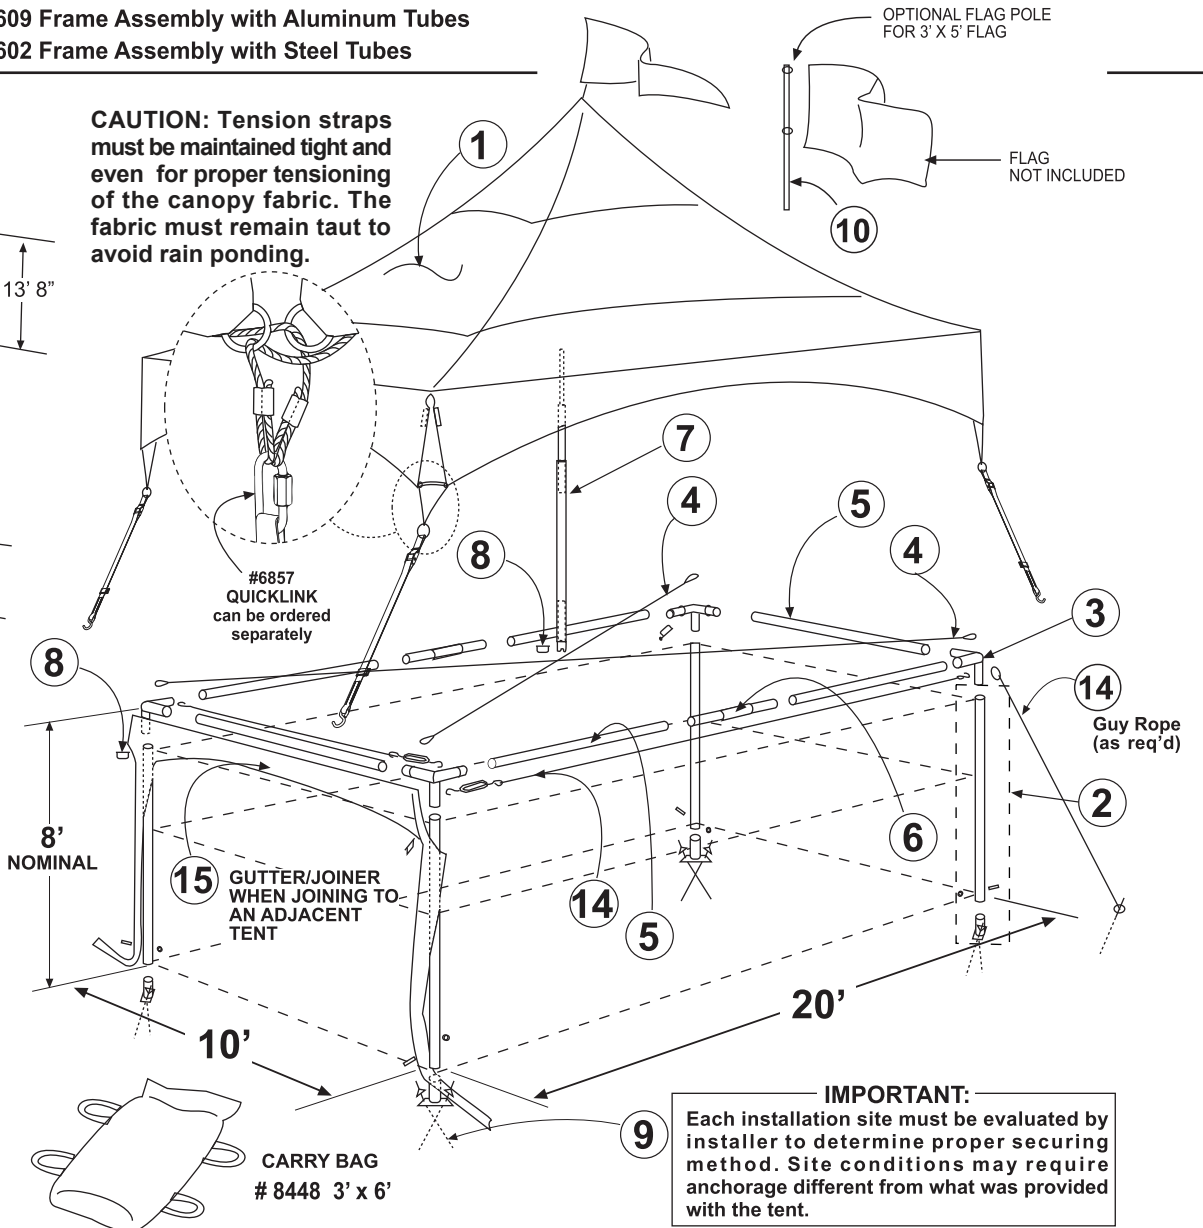

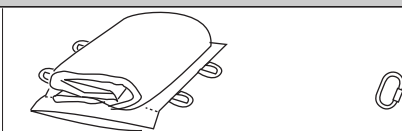

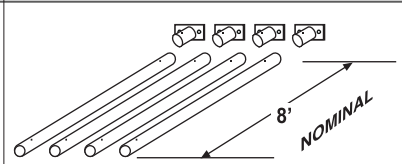

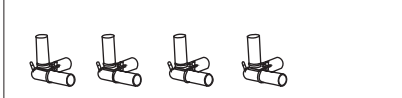

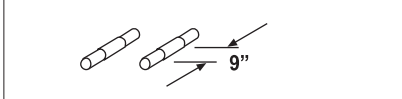

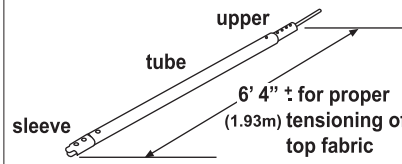

*WIND SPEED - is the wind directly on the tent. The wind speed reported through the media is usually measured 33' above ground at a local airport weather station. Wind load on your tent may be effected considerably by topography, trees, buildings, fences and other adjacent roughness.

To increase anchorage and stability, guy ropes are recommended. Much of the anchor loading may be transferred from the post base to the guy anchors.

Guy ropes should be used in high wind areas.

CAUTION: Tension straps must be maintained tight and even for proper tensioning of the canopy fabric. The fabric must remain taut to avoid rain ponding.

CANOPY		PART	PART NO.	QTY	
1 TOP		Top	#10619	1	
		Quicklink	#6857	4	
		Tension Strap	#15050	4	
FRAME					
2 POST ASSEMBLY		Base	#10514	4	
		Post	alum	#10591	4
			steel	#10590	4
		Bolts	#4093	4	
		Nuts	#8369	4
