

PEAK MARQUEE™ TENT

MQ2030T TWIN PEAK

12252 Frame Assembly with Aluminum Tubes
12264 Frame Assembly with Steel Tubes

ANCHOR LOAD GUIDE

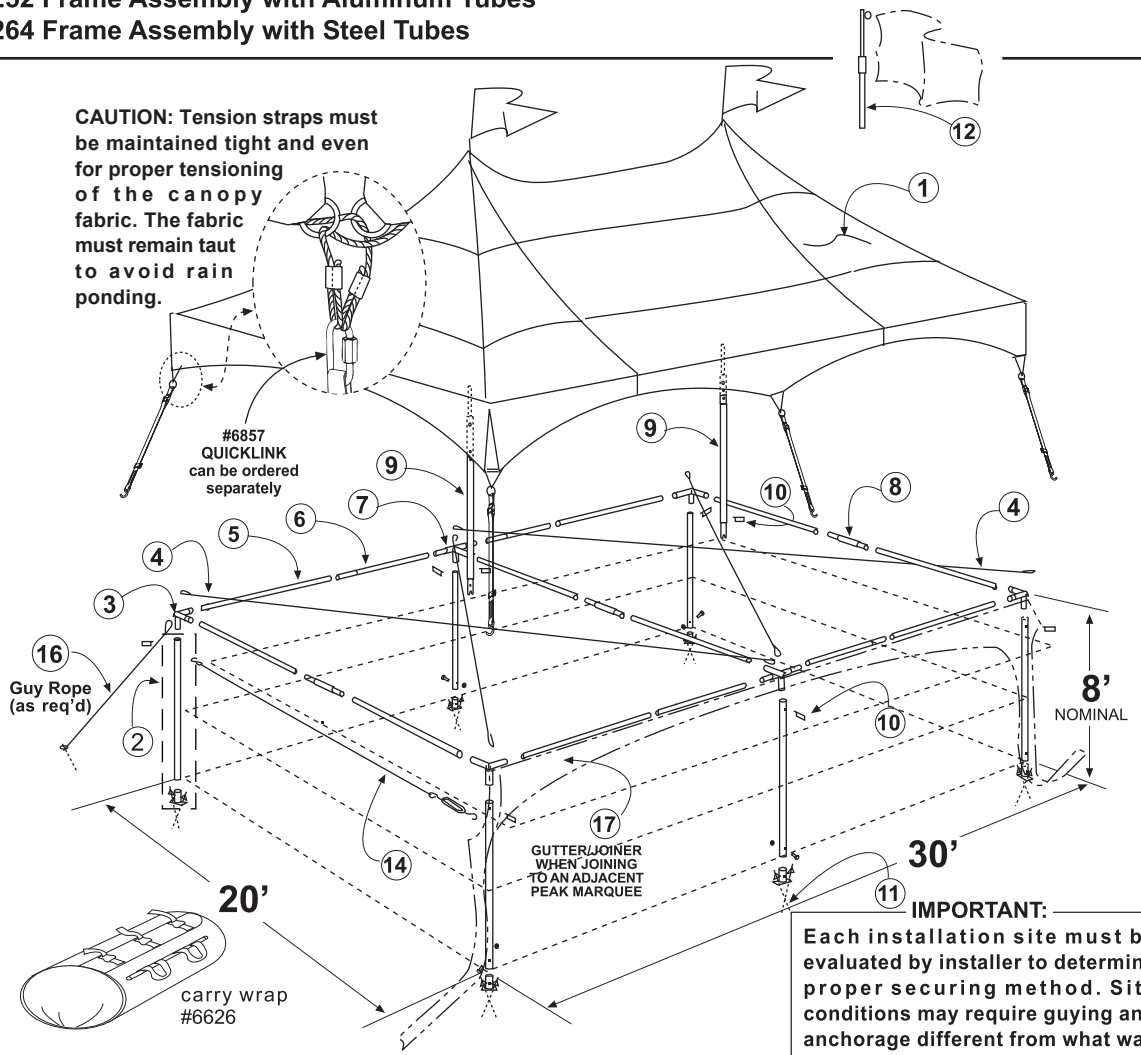

*WIND SPEED - is the wind directly on the tent. The wind speed reported through the media is usually measured 33' above ground at a local airport weather station. Wind load on your tent may be effected considerably by topography, trees, buildings, fences and other adjacent roughness.

To increase anchorage, tent strength and stability, guy ropes are recommended. Much of the anchor loading may be transferred from the post base to the guy anchors. Guy ropes should be used in high wind areas.

CAUTION: Tension straps must be maintained tight and even for proper tensioning of the canopy fabric. The fabric must remain taut to avoid rain ponding.

IMPORTANT: Each installation site must be evaluated by installer to determine proper securing method. Site conditions may require guying and anchorage different from what was provided with the tent.

CANOPY

	PART	PART NO.	QTY
1 TOP	Top	#12253	1
	Quicklink	#6857	6
	Tension Strap	#15050	6

FRAME

2 POST ASSEMBLY	Base	#10514	6	
	Post	Alum	#10591	6
