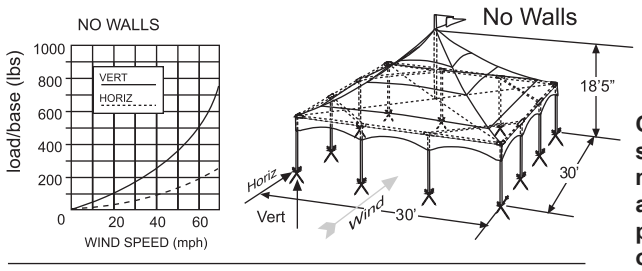
WARNER SHELTER SYSTEMS LIMITED

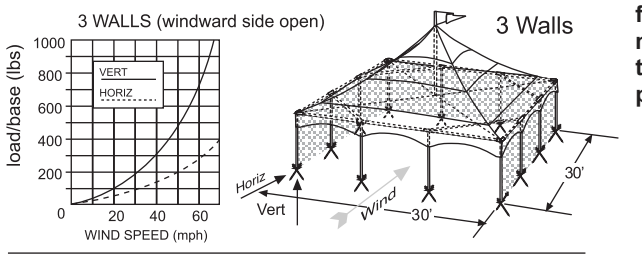
PEAK MARQUEE™ TENT

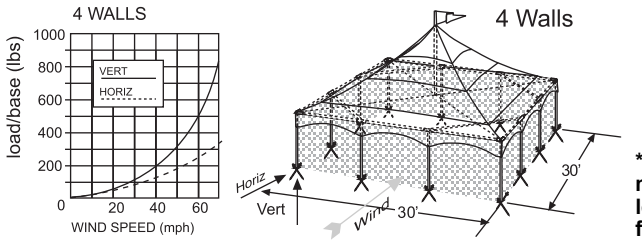
MQ30

 # 10567 Frame Assembly with Aluminum Tubes
 # 10606 Frame Assembly with Steel Tubes

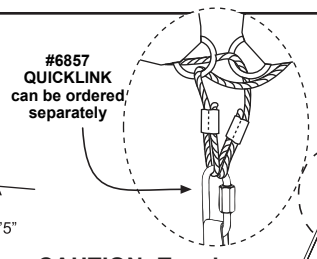
ANCHOR LOAD GUIDE



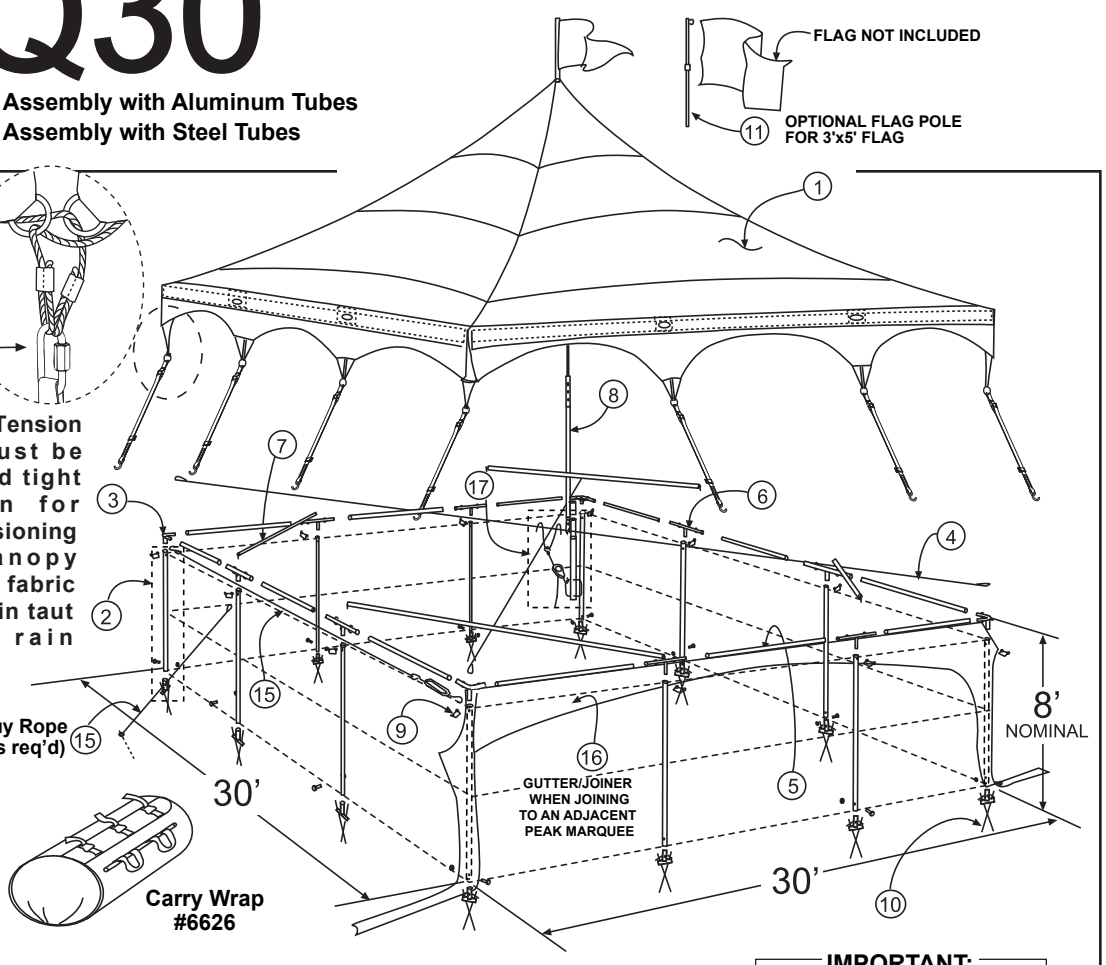




*** Guy ropes should be used in high wind areas.**



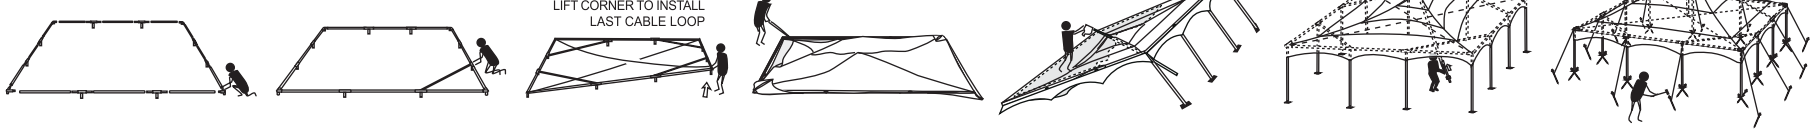
CAUTION: Tension straps must be maintained tight and even for proper tensioning of the canopy fabric. The fabric must remain taut to avoid rain ponding.



***WIND SPEED - is the wind directly on the tent. The wind speed reported through the media is usually measured 33' above ground at a local airport weather station. Wind load on your tent may be reduced considerably by topography, trees, buildings, fences and other adjacent roughness.**

To increase anchorage and stability, guy ropes are recommended. Much of the anchor loading may be transferred from the post base to the guy anchors.

IMPORTANT:
Each installation site must be evaluated by installer to determine proper securing method. Site conditions may require anchorage different from what was provided with the tent.



CANOPY

		PART		PART NO.	QTY
1 TOP		Top		#10624	1
		Quicklink		#6857	12
		Tension Strap		#15050	12

FRAME

2 POST ASSEMBLY		Base		#10514	12
		Post	alum	#10591	12
			steel	#10590	
		Bolts		#4093	12
		Nuts		#8369	12
